The pandemic

At first, when I heard of COVID-19 I thought very little of it and never put any real thought into what would happen if it were to ever come to the United States. However, as time progressed, and more countries were affected by this virus, I started to be more aware of this virus and started to read more articles published by various news networks to see how bad this virus really is. After reading about this virus I started to realize what it really does and what part of the body it attacks. And as time progressed and as we caught wind that other schools will be shutting down. This is when I realized that we are going to be dealing with a pandemic.
